

Supply Chain 2049: Future Supply Chain Trends

Big Data Meets Supply Chain

Over the course of 2015 to 2020, the UK Manufacturing sector will gain £8.5 billion pounds in efficiency benefits due to implementing big data analytics to its Supply Chain. In the same period, professional services will yield £3.5 billion in efficiency benefits from Big Data.

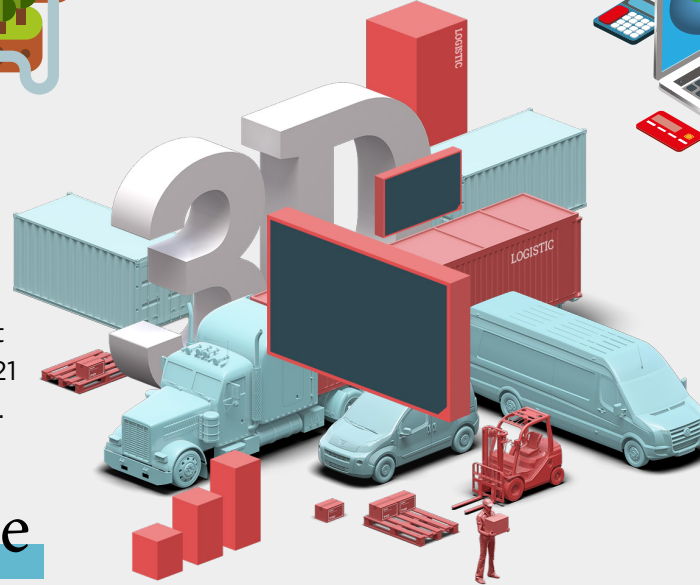

Supplying IoT

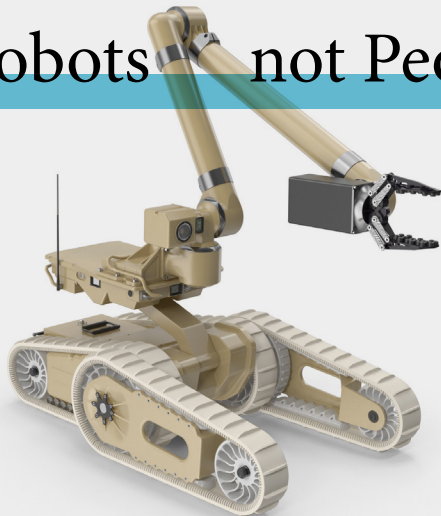

The Internet of Things (IoT) will benefit the UK Manufacturing sector in efficiency benefits of £4.042 billion over the period from 2015-2020.

The Future is 3D

3D Printing Industry is estimated to have a market value of \$26.5 billion in 2021 up from \$8.8 billion in 2017.

Robots not People

British Retail Consortium predicted almost a third of the UK's 3m shop jobs would disappear by 2025 due to companies replacing people with technology.

Connected Risks?

In the *SCM 2017 Future of Supply Chain* survey of supply chain managers, 44% were concerned with data security, 26% were concerned with a natural disaster affecting supplier facilities and 19% were concerned with geo-political perils.
